

Monitoring, Evaluation, Accountability and Learning

Monitoring

Monitor whether activities are completed according to protocol when a trigger is activated

[Template for monitoring and resources](#)

[Evaluation](#)

Develop a Theory of Change for each action.

[Example Theory of Change and resources.](#)

[Develop a post-action household survey](#) to evaluate whether the assumptions and results from the Theory of Change occurred.

[Example survey and resources.](#)

After action is triggered, carry out household-level surveys.

[Select "comparison" areas](#) if possible and implement the survey in these areas as well.

Make an evaluation report. [Example.](#)

Accountability

Implement a complaint mechanism for beneficiaries to provide feedback

Learning

Compile lessons learned during the preparation phase, activation phase, and evaluation phase of the intervention.

Share lessons learned either through documents or a workshop of relevant stakeholders.
